## About me

I have gained experience working in various companies through the years and half a year ago I decided to change my career path and started taking programming courses. After successfully completing the Vilnius Coding School programming basics, I understood that I want to grow my career in this field so I continued trainings in JavaScript (Front-End) and now I am open to new career opportunities as a junior developer.

## Education

### Basic of programing

Vilnius Coding School
2022-01-10 -- 2022-03-18, 9 weeks 90hours

I acquired the basics of website development: I got acquainted with programming principles, language syntax, learned to work with data (JAVA, SQL),

### JavaScrip (Front-End)

Vilnius Coding School
2022-05-17--2022-07-08, 8 weeks 70hours

I acquired and strengthened the basics of website development: I learned how to create a website framework using HTML5, how to style a website using CSS, make it dynamic with JavaScript, adapt ReactJs, program content management systems.
